

IT'S NEW IT'S EEV IT'S *photon* CCD

Years of research and development have enabled EEV to produce in the most modern CCD plant in Europe, a completely new range of CCTV Cameras ... "The Photon". They are tough, and very reliable featuring custom designed ceramic covered hybrid circuits which provide sensor drives and video processing in a miniature housing. Our new dedicated fabrication facility provides the low noise CCD sensor for these cameras which initially will offer a choice of variable integration time, switchable between 1 ms and TV, together with standard features such as gen-lock, auto iris drive, a.g.c. and video clamp. The cameras power requirement is less than 4 watts, at either 12V d.c. or via a line power supply. More new models will be released later this year as the Photon CCD family grows, but in the meantime, contact us for details of these exciting new cameras.
