

Marconi provides a complete range of sound and television broadcasting equipment. Complete systems surveyed, planned, installed, and maintained in all parts of the world.

Marconi semi-automatic master switching system

B3720

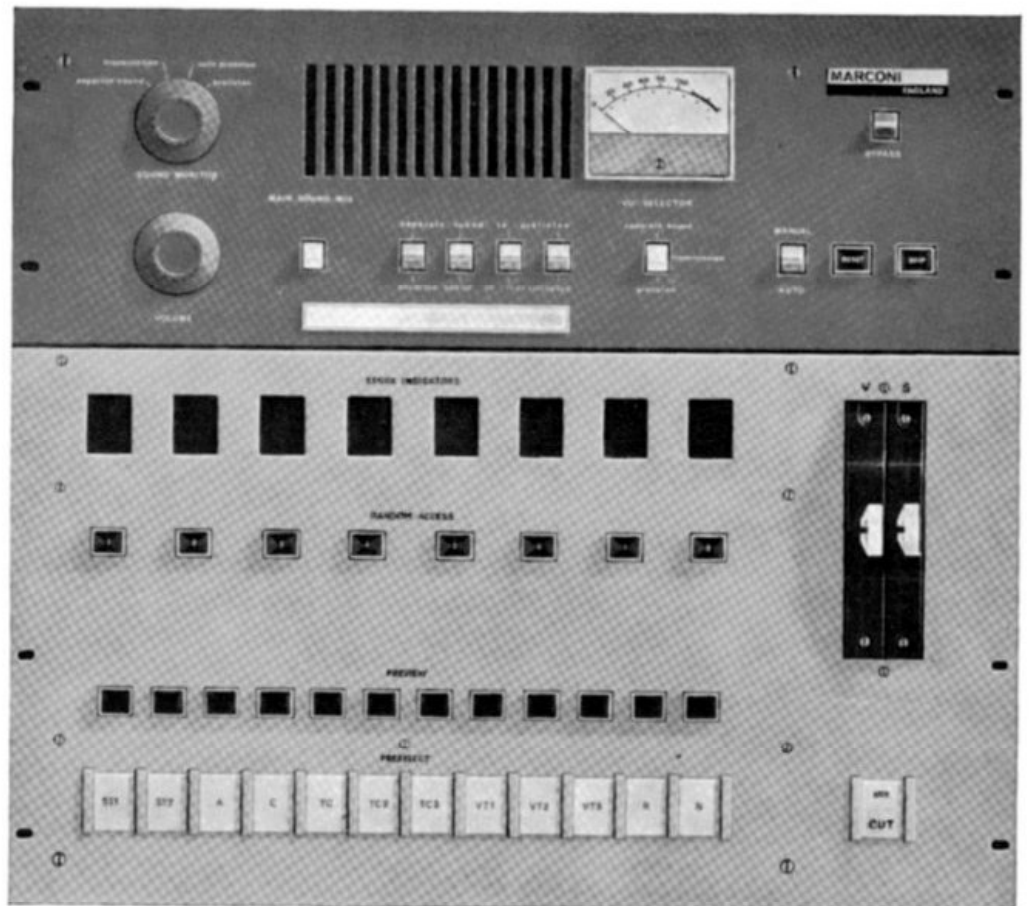

The B 3720 Switching Equipment is a master control switcher with a memory store to control programme sources in correct sequence, allowing the operator to concentrate on the correct timing of the programme change, the next source being selected automatically.

Vision and sound switching for 12 inputs

Automatic sequencing of up to 8 events

Full colour standards

Fully transistorized
