

# The Norelco "Little Shaver" does everything its big brother, the PC-70, can do ...and gets around a lot more.

This is the new Norelco PCP-70 Portable Color Television Camera. We call it the "Little Shaver" for short.

Like its big brother, the PC-70, which is used on the majority of top network live

and taped shows, it employs the exclusive Norelco 3-Plumbicon\* tube system that provides the truest color, highest resolution and maximum sensitivity available today.

The "Little Shaver" goes where the action is.

Sports. News and documentaries. Political events... just about anywhere a man can go.

The "Little Shaver" is fully compatible with the camera control unit of the PC-70 studio camera. Thus, present PC-70 owners have an even greater advantage in that they can have the versatility of the PCP-70 with

no further expense for control equipment.

Instantly accepted by all the major networks, the Norelco PCP-70 is the portable that gives you the

world's best color television picture.

If you want faithful color reproduction in a port-

able camera, you want the "Little Shaver." For a live demonstration and technical data, call or write our representative, Visual Electronics.

\*Registered trade mark for television camera tubes.
