

Norelco®

PCP-90U UNIVERSAL PORTABLE
PLUMBICON COLOR TELEVISION CAMERA

Now the widely acclaimed PCP-90 Portable Camera which has had worldwide application in SPORTS, NEWS, and PRODUCTION - is available in a version which greatly extends its operational application by interfacing with new or existing Norelco Studio/Field Camera Control Systems.

As illustrated diagrammatically on the reverse side of this sheet Professional Portable Camera capability can now be extended to the: - PC-70 - PC-72 - PC-100

Illustrated above is the Universal Professional Portable Camera Head and the accompanying small hippack which permits optional interconnection to the Norelco PC-70 and PC-72 Camera Control Systems through standard camera cable.

This capability when added to new or existing Norelco cameras preserves all normal video processing functions in the camera control unit.

Production and news application are further enhanced with this camera since the Universal Portable Camera Head maintains all capabilities of interfacing with the optional PCP-90 Backpack - The only professional portable camera in widespread use with available capabilities for self-contained battery mode operation and wireless interconnection.

Multiple choices of fixed or zoom lens are available to suit varying production applications.

Weight of Camera Head including 3" direct view viewfinder - Less than 15 Pounds.

Weight of PCP-70B or PCP-72 Hippack - Less than 10 Pounds.
