

The picture is worth a thousand words

The Marconi Mark IX Colour Camera

You don't have to look very far to appreciate why TV cameramen are behind the Marconi Mark IX Colour Camera.

With an amazingly sensitive optical assembly giving pictures down to 50 lux, a new electronic package including head amplifiers and talk-back circuit coupled with a lightweight multi-core camera cable, small CCU and low power consumption, the Mark IX is the star performer in every studio and outside broadcast role.

To put yourself in the picture, contact: Adrian Moore, Studio Sales Manager.
