

TK-76 from RCA: new TV colour camera with film-camera freedom, and 32 advanced features.

No backpack, unitised electronics.

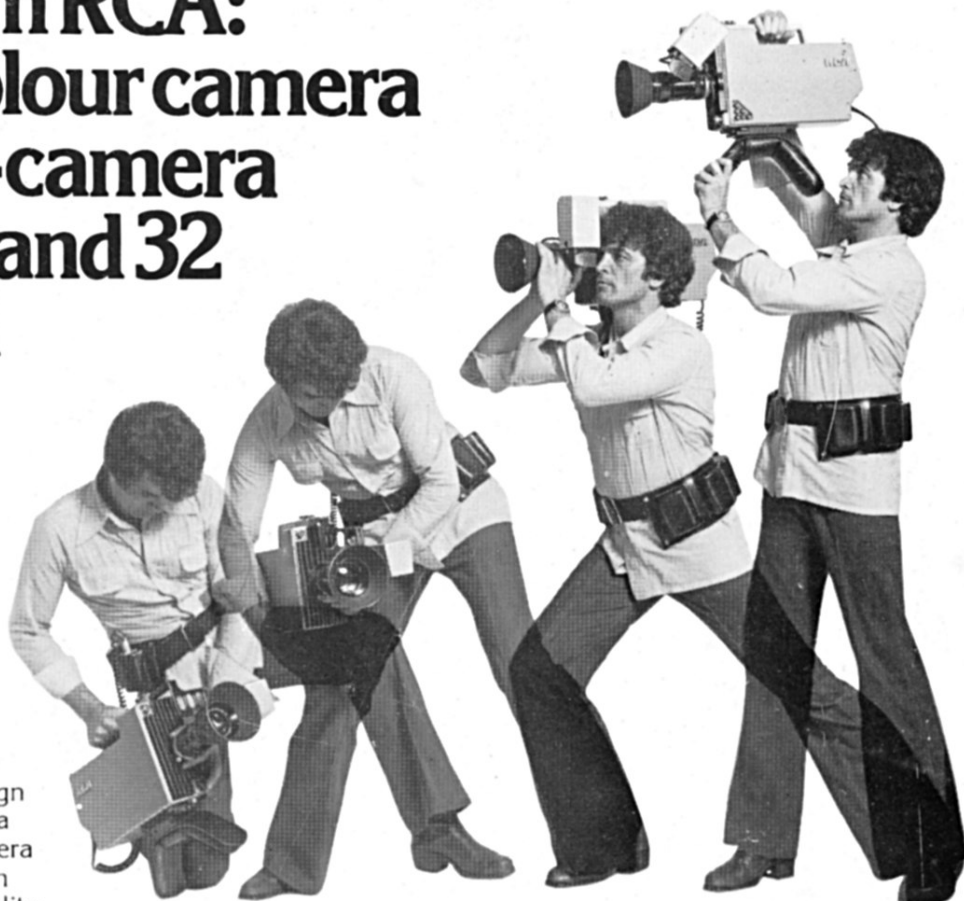

Take a strong, cast aluminium case. Engineer in 32 quality features which include all the electronics other camera systems consign to a backpack. The result is a 9 Kg (20 lb.) colour TV camera with the mobility of a 16-mm film camera, and picture quality to professional standards. That's the TK-76.

TK-76 gives the operator creative control.

Automatic features and self-contained design make the TK-76 easy to use, allowing the camera operator to concentrate on the creative side of shooting. It's the right camera for fast-moving news operations, and closed circuit systems.

The TK-76 is priced low for all its features.

The TK-76 offers 32 advanced features, many of which are not found in other cameras of this type.

For example: fast turn-on; shock-mounted prism optics; built-in sync generator with gen-lock; automatic iris; automatic white balance; horizontal and vertical aperture correction; adjustable viewfinder, and operation powered by a 2.7 Kg (6 lb.) battery belt or an automobile's 12 V DC cigarette lighter.

What's more, the TK-76 costs less than colour portable cameras of comparable quality.

Order the TK-76 now.

NTSC and PAL versions of the TK-76 will be available soon. Many knowledgeable broadcasters are ordering now. To reserve yours, or receive more information, contact your nearest RCA representative.
