

The new Marconi MARK V solid-state television camera

The latest and most advanced in the line of 4½ in. Image Orthicon Cameras produced by Marconi's, who pioneered the use of this type of camera and have sold more than all other manufacturers put together.

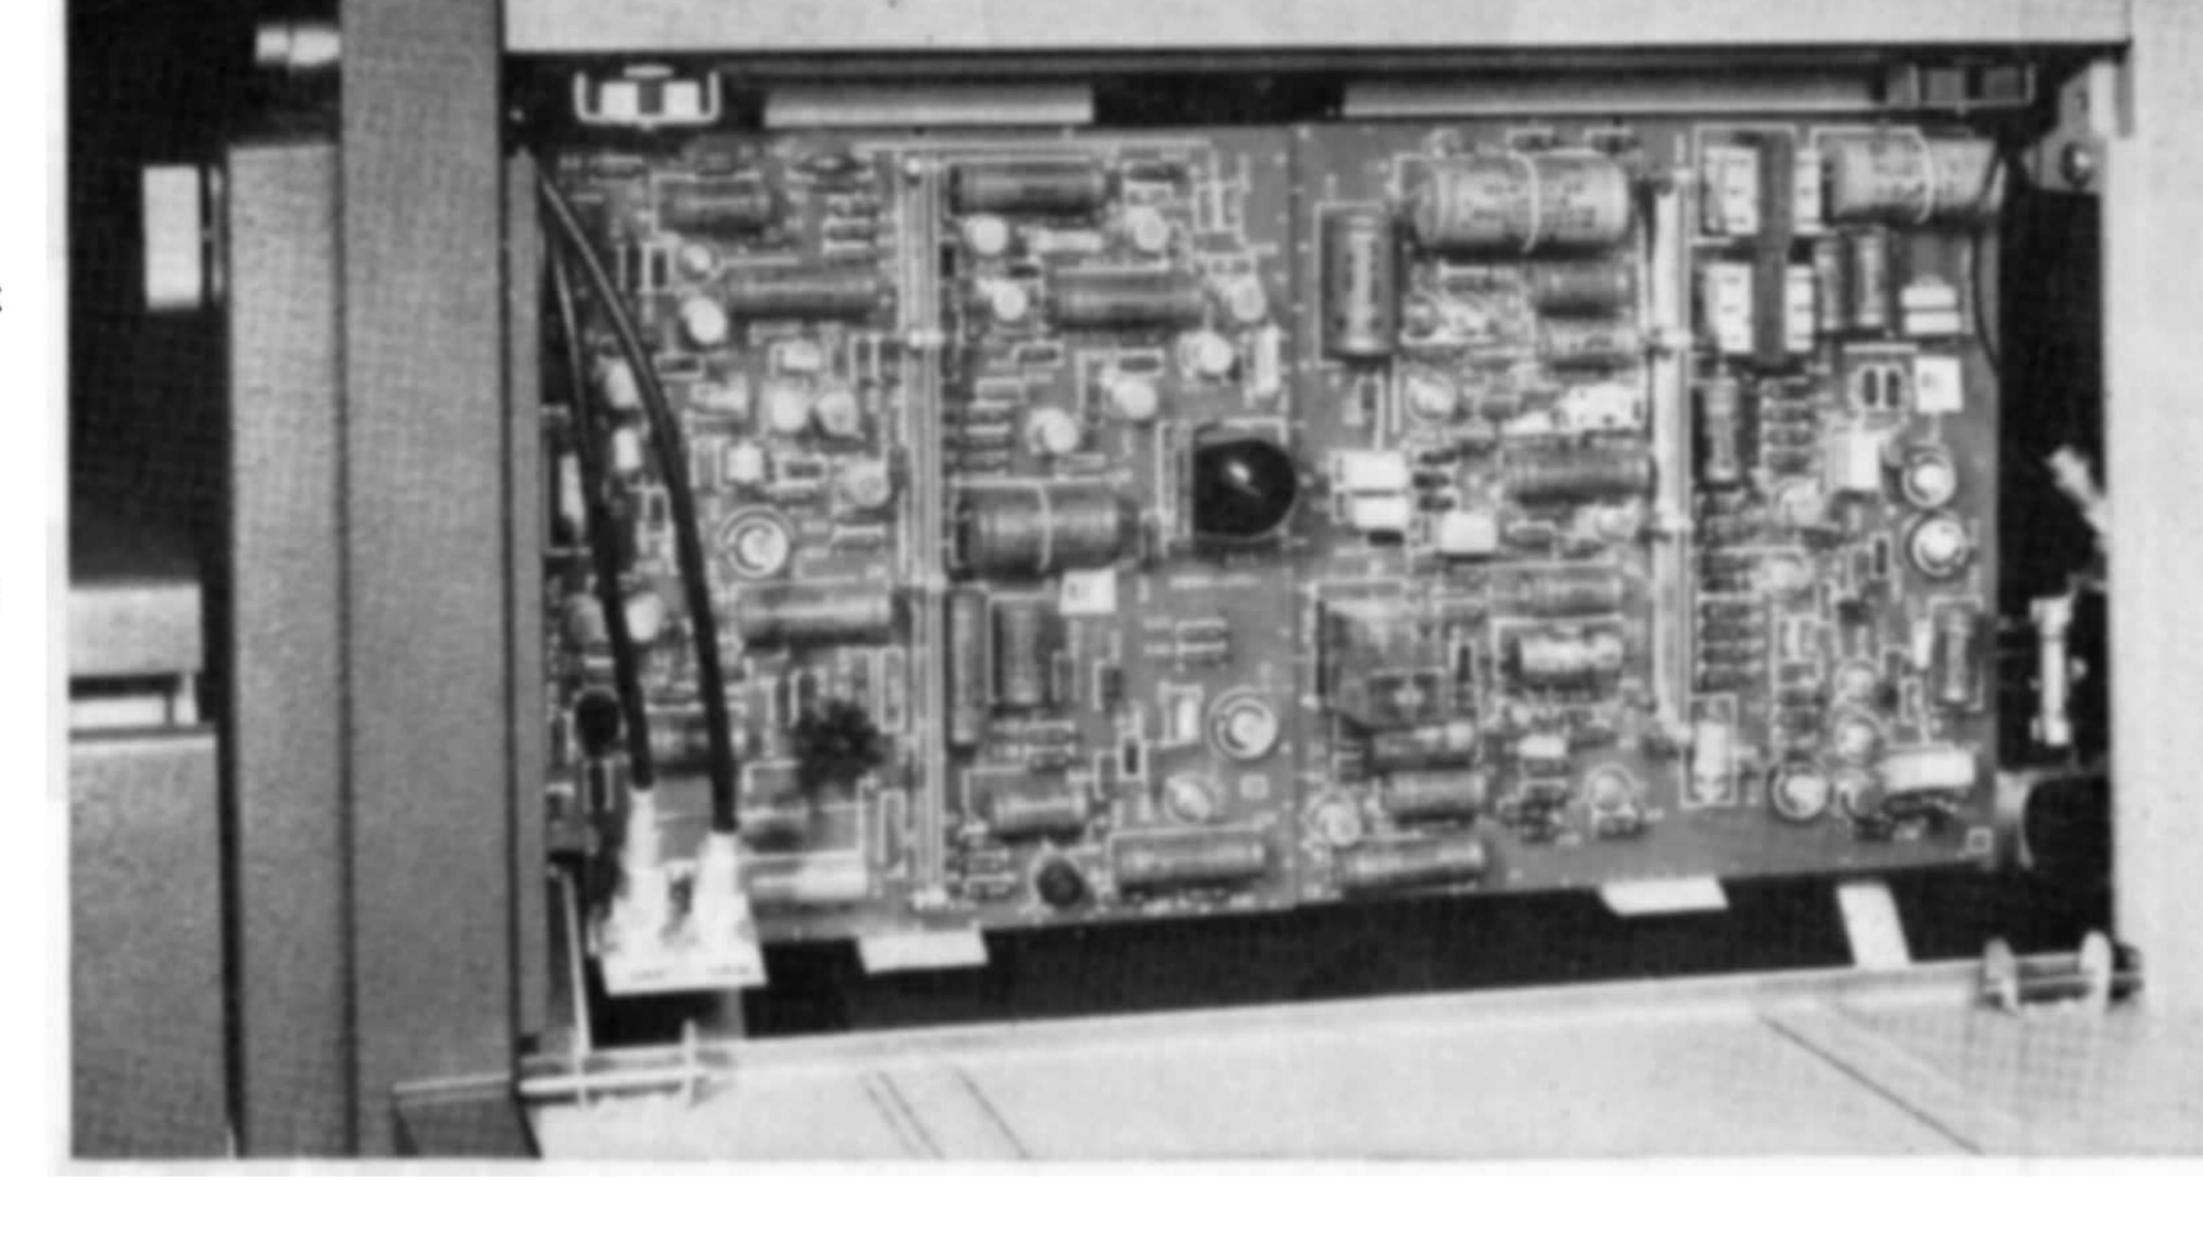

ALL SOLID STATE

Silicon transistors used throughout the chain to give outstanding stability and reliability. Constant output ensured despite mains variations, temperature changes or external fields. Easy access for tube changing. No image orthicon preset controls.

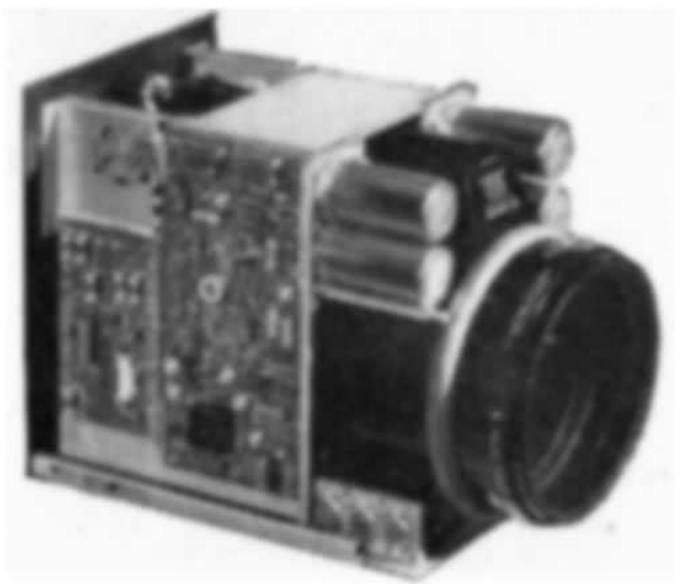

TILTING VIEWFINDER

Ensures most comfortable viewing position for all camera angles. Detachable up to 30 ft. from camera. Brilliant picture (200 ft.-Lamberts). Camera, external or mixed signals available at cameraman's choice.

OUTSTANDING PACKAGING

Single rack mounting camera control unit, control panel and power supply. Circuitry contained in seven plug-in printed wiring modules, giving easy front access for maintenance.

INTEGRATED ZOOM LENSES

Choice of servo or manually controlled zoom lenses gives infinitely variable focal length for exact picture framing. Simplified camera operation and improved programme continuity.

SIMPLE CONTROL

Simple compact control panel, four of which can be mounted on a console desk gives complete 'hands off' operation.

The smallest, lightest 4½ in. Image Orthicon Camera in production as simple to operate as an ordinary amateur photographic camera
